EXPERIENCE:

EVAPCO - Commercial HVAC Drafter

2022 – 2025

Created detailed, dimensioned technical drawings using Solid Edge for manufacturing
Designed custom evaporator components based on client specifications
Communicated with engineers and machinists to ensure accurate production and assembly
Contributed to multiple custom unit builds, improving design efficiency and turnaround time

EDUCATION:

University of Maryland Baltimore County

2022 – 2026

Bachelor of Science in Information Systems

DESIGN PROJECTS:

Home Lab

- Built and administered a Proxmox virtualization environment hosting Linux virtual machines and self-hosted services.
- Configured TCP/IP networking, VLANs, VPN connectivity, static routing, and firewall rules.
- Diagnosed and resolved network connectivity issues using Linux networking tools.
- Implemented secure remote access using Tailscale and documented network architecture and troubleshooting procedures in GitHub.

Oil Spill Clean Up (Intro to Engineering)

- Designed and built a prototype robot to simulate oil spill cleanup using mechanical components and an iterative design method
- Tested to identify design flaws and improve efficiency
- Collaborated in a team environment to create and refine the prototype
- Competed against other groups in a class competition

Assisted Bed (Engineering Design and Development)

- Researched solutions for elderly people to assist in getting in and out of bed
- Developed and presented a functional design proposal to a panel of engineers
- Focused on usability, safety, and real-world application for healthcare environments

SKILLS:

Programming: Java, Python, C++, SQL

Tools & Software: SolidWorks, Solid Edge, Revit, MATLAB, AutoCAD

Systems: Linux, Windows

Networking: TCP/IP, VLANs, Routing, VPNs, DNS, DHCP, Linux Networking

Other: Microsoft Office Suite, Adobe Suite

HONORS & AWARDS:

Presidential Award of Academic Excellence 2018
Honor Roll 2018 – 2022

Certifications:

CompTIA Network+ (Expected 2026)
CompTIA A+ (Expected 2026)
CCNA (Expected 2027)
